

ADULT CLS DECISION TREE

Planning Process and Goal Development

Identify Personal Care Needs
(direct, hands-on assistance)

MDHHS application for Home Help
or Expanded Home Help

Identify CLS Needs

Community Inclusion

Productivity

Independence

Note: Home Help determination will likely impact
authorization for services.

Use of community services
and participation in community activities
in same manner as typical citizen.
Example: recreation, sporting events,
civic activities.

Engage in activities
that lead to self-sufficiency.
Example: working, attending school.

Personally defined by the individual in the
person centered planning process.
Example: Living alone, deciding what to eat,
control of finances.

Estimate time needed
to accomplish stated interest

Time needed to assist in
training with household tasks, laundry,
meal preparation, shopping, etc.

Time needed to help with remembering
when/how to take medications, to
attend medical appointments, to assist
with money management/payee, etc.

Identify specific goal and objective.
(who, what, when, where)

Identify specific goal and objective.
(who, what, when, where)

Identify specific goal and objective.
(who, what, when, where)

Write goal adjusting for time spent
in the community
doing work, skill-building, etc.

Write goal adjusting for availability
of natural supports or
other community resources

Write goal adjusting for natural supports or
other services which address the outlined needs.
For example: Case managers/nurses
may assist with stated goals
as part of their role in the treatment process.
