

MEDICATION MANAGEMENT FOR ADHD: A PRIMER FOR NON- PRESCRIBERS

PRESENTED BY: DR. SARAH SCHRAUBEN

MCCMH child psychiatrist Dr. Sarah Schrauben will introduce the different medication classes used to treat ADHD, as well as the evidence base behind the use of medication in managing ADHD. She will also focus on how case managers and therapists can support families around using these medications, and what side effects team members should be aware of. Time will be left for any questions you may have, so feel free to bring a list of specific questions you have in this area.
