Do you know **WHEN** or **HOW** to talk to your youth clients and their caregivers about suicide lethal means restriction? Do you know **WHY** this is an effective tool for suicide prevention? This skill can be highly effective in preventing suicide attempts but is not regularly discussed clinically. Come and check it out and join in the conversation that can save a life!

## Training Objectives:

1. Access to the most current data about youth suicide trends in our area, including myths and facts about suicide itself.
2. Increased knowledge about the association between access to lethal means and suicide, and the role of means restriction in preventing suicide.
3. Increased skills and confidence to work with clients and their families to assess and reduce their access to lethal means.
