TrainingOffice@  
mccmh.net**

### **OBJECTIVES:**

- Define and increase awareness for Neonatal Abstinence Syndrome (NAS).
- Identify Some Medications and Substances that may contribute to NAS, and ways to help decrease incidence.
- Increase staff's ability to create SMART objectives and specific interventions within the Individualized Plan of Service focused on Integrated Care for Individuals affected by Neonatal Abstinence Syndrome.

**Trainer Biography:** Jeffrey Clark RN, ADN, is the Nursing Administrator for Macomb County Community Mental Health. His current role is in creating agency policy and procedures and encouraging the growth of integrated care and positive individualized outcomes using evidence-based approaches. He has over Sixteen years of experience as a registered nurse in the state of Michigan. Jeff has worked in both inpatient and outpatient mental health care, with previous experience in emergency and cardiac care hospital settings. He has developed numerous trainings for integrating health in the Community Mental Health setting and currently sits in the Integrated Care Work Group meetings for MCCMH.
