

MCOSA's Primary Functions

- Determine need for substance use services through Needs Assessment, Public Comment, and Utilization review
- Develop an Annual Plan and monitor and evaluate progress
- Establish a Continuum of Care by contracting for services with licensed and accredited programs
- Complete all State and Federal reporting requirements
- Oversee the coordination of substance use prevention, treatment and recovery services through evaluation and monitoring
- Develop policy, technical assistance and trainings

Treatment Services

- **Early Intervention:** Services that address problems or risk factors that appear related to use of alcohol or other drugs in an effort to help the individual recognize the harmful consequences of inappropriate use.
- **Outpatient:** Scheduled counseling services provided in a clinic setting. Services include assessment, group, individual, didactic and family counseling, psychiatric evaluation for co-occurring disorders, and referral for other services as needed.
- **Intensive Outpatient:** Therapeutic services provided in a structured outpatient setting for three hours per day, meeting three times per week. Core services include assessment, didactic education and group therapy, with individual counseling, psychiatric and medical services or consultation.
- **Medication Assisted Treatment:** Counseling and pharmacology services provided in an outpatient setting for individuals who are opioid dependent. Services are performed under the care of a licensed physician in a DEA approved licensed program with medication reviews occurring at least every 60 days. A full array of outpatient counseling service are provided along with supporting medication and medical services.
- **Peer Support:** Trained individuals with long term stable provide problem solving skills and advocacy to help clients achieve recovery goals by addressing relapse issues, identifying community resources and providing hope in achieving goals.
- **Residential:** Planned group, individual and educational counseling sessions provided as an intense, organized, daily treatment regimen by a multi-disciplinary staff who provide 24-hour monitoring.
- **Sub-acute Detoxification/Withdrawal Management:** Supervised 24-hour care in a sub-acute residential setting, typically lasting 3-5 days, to manage the effects of withdrawal from physical dependency on substances before transferring to the next level of care for clinical treatment services.
- **Recovery Home Services:** Alcohol and drug free housing environments whose rules, peer-led groups, staff activities and other structured operations are directed toward maintenance of sobriety for persons who exhibit relapse potential and/or lack of suitable recovery living environments.
- **Opioid Health Home Services:** An Opioid Health Home is a model of care that provides comprehensive care management and coordination services to Medicaid beneficiaries with opioid use disorder. The model takes a holistic approach to health care and provides one "home" base for coordinating recovery and health needs while functioning as the central point of contact for directing patient-centered care across the broader health care system.
- **Recovery Community Center:** A peer-operated center that serves as local resources of community-based recovery supports providing support, socialization, education, and information to individuals in recovery. The Center promotes preventing relapse, sustaining recovery, and improving quality

Prevention Services

- **Alternative Activity:** Positive activities that exclude alcohol and other drugs by offering after school activities and assisting in community services.
- **Community Based:** Networking, technical assistance and training to community coalitions that address substance use issues.
- **Education:** Facilitate evidenced based substance abuse curriculums in schools, parenting workshops, and in community groups.
- **Environmental:** Work with communities to change norms and policies by reducing access to substances.
- **Information Dissemination:** Provide substance abuse knowledge and awareness at health fairs, community events, and to community groups.
- **Problem Identification & Referral:** Identify, educate, and refer individuals who are at-risk of abusing substances.
