## COLUMBIA-SUICIDE SEVERITY RATING SCALE (C-SSRS)

Lifetime Recent

Version 1/14/09 m9/12/17

Posner, K.; Brent, D.; Lucas, C.; Gould, M.; Stanley, B.; Brown, G.; Fisher, P.; Zelazny, J.; Burke, A.; Oquendo, M.; Mann, J.

## Disclaimer:

This scale is intended to be used by individuals who have received training in its administration. The questions contained in the Columbia-Suicide Severity Rating Scale are suggested probes. Ultimately, the determination of the presence of suicidal ideation or behavior depends on the judgment of the individual administering the scale.

Definitions of behavioral suicidal events in this scale are based on those used in <u>The Columbia Suicide History Form</u>, developed by John Mann, MD and Maria Oquendo, MD, Conte Center for the Neuroscience of Mental Disorders (CCNMD), New York State Psychiatric Institute, 1051 Riverside Drive, New York, NY, 10032. (Oquendo M. A., Halberstam B. & Mann J. J., Risk factors for suicidal behavior: utility and limitations of research instruments. In M.B. First [Ed.] Standardized Evaluation in Clinical Practice, pp. 103-130, 2003.)

For reprints of the C-SSRS contact Kelly Posner, Ph.D., New York State Psychiatric Institute, 1051 Riverside Drive, New York, 10032; inquiries and training requirements contact posnerk@nyspi.columbia.edu

SUICIDAL BEHAVIOR (Check all that apply, so long as these are separate events; must ask about all types)			Past 3 months	
Actual Attempt:  A potentially self-injurious act committed with at least some wish to die, as a result of act. Behavior was in part thought of as roneself. Intent does not have to be 100%. If there is any intent/desire to die associated with the act, then it can be considered a attempt. There does not have to be any injury or harm, just the potential for injury or harm. If person pulls trigger who mouth but gun is broken so no injury results, this is considered an attempt.  Inferring Intent: Even if an individual denies intent/wish to die, it may be inferred clinically from the behavior or circumstances highly lethal act that is clearly not an accident so no other intent but suicide can be inferred (e.g., gunshot to head, jumping fror high floor/story). Also, if someone denies intent to die, but they thought that what they did could be lethal, intent may be inferred Have you made a suicide attempt?	Yes No	Yes No		
Have you done anything to harm yourself?  Have you done anything dangerous where you could have died?  What did you do?  Did you as a way to end your life?  Did you want to die (even a little) when you?  Were you trying to end your life when you?  Or Did you think it was possible you could have died from?  Or did you do it purely for other reasons / without ANY intention of killing yourself (like to relieve stress get sympathy, or get something else to happen)? (Self-Injurious Behavior without suicidal intent)	, feel better,	Total # of Attempts	Total # of Attempts	
If yes, describe:  Has subject engaged in Non-Suicidal Self-Injurious Behavior?			Yes No	
Interrupted Attempt:  When the person is interrupted (by an outside circumstance) from starting the potentially self-injurious act (if not for that, actual have occurred).  Overdose: Person has pills in hand but is stopped from ingesting. Once they ingest any pills, this becomes an attempt rather that attempt. Shooting: Person has gun pointed toward self, gun is taken away by someone else, or is somehow prevented from pullithey pull the trigger, even if the gun fails to fire, it is an attempt. Jumping: Person is poised to jump, is grabbed and taken down Hanging: Person has noose around neck but has not yet started to hang - is stopped from doing so.	Yes No	Yes No		
Has there been a time when you started to do something to end your life but someone or something stopped you before you actually did anything? If yes, describe:			Total # of interrupted	
Aborted or Self-Interrupted Attempt: When person begins to take steps toward making a suicide attempt, but stops themselves before they actually have engaged in any self-destructive behavior. Examples are similar to interrupted attempts, except that the individual stops him/herself, instead of being stopped by something else.  Has there been a time when you started to do something to try to end your life but you stopped yourself before you actually did anything?  If yes, describe:			Yes No	
			Total # of aborted or self-interrupted	
Preparatory Acts or Behavior:  Acts or preparation towards imminently making a suicide attempt. This can include anything beyond a verbalization or thought, such as assembling a specific method (e.g., buying pills, purchasing a gun) or preparing for one's death by suicide (e.g., giving things away, writing a suicide note).			Yes No	
Have you taken any steps towards making a suicide attempt or preparing to kill yourself (such as collecting pills, getting a gun, giving valuables away or writing a suicide note)?  If yes, describe:			Total # of preparatory acts	
	Attempt /	Most Lethal Attempt Date:	Initial/First Attempt Date:	
<ol> <li>Actual Lethality/Medical Damage:         <ol> <li>No physical damage or very minor physical damage (e.g., surface scratches).</li> <li>Minor physical damage (e.g., lethargic speech; first-degree burns; mild bleeding; sprains).</li> <li>Moderate physical damage; medical attention needed (e.g., conscious but sleepy, somewhat responsive; second-degree burns; bleeding of major vessel).</li> </ol> </li> <li>Moderately severe physical damage; medical hospitalization and likely intensive care required (e.g., comatose with reflexes intact; third-degree burns less than 20% of body; extensive blood loss but can recover; major fractures).</li> <li>Severe physical damage; medical hospitalization with intensive care required (e.g., comatose without reflexes; third-degree burns over 20% of body; extensive blood loss with unstable vital signs; major damage to a vital area).</li> <li>Death</li> </ol>	Enter Code	Enter Code	Enter Code	
Potential Lethality: Only Answer if Actual Lethality=0 Likely lethality of actual attempt if no medical damage (the following examples, while having no actual medical damage, had potential for very serious lethality: put gun in mouth and pulled the trigger but gun fails to fire so no medical damage; laying on train tracks with oncoming train but pulled away before run over).
