**WHY:**

Mental health challenges – such as depression, anxiety, psychosis and substance use – are common in the United States. In fact, more than one in five Americans will have a mental health problem in any given year. The National Council for Mental Wellbeing certifies individuals throughout the nation, including Macomb County CMH, to provide Mental Health First Aid courses to prepare their communities with the knowledge and skills to help individuals who are developing a mental health problem or experiencing a mental health crisis. The training helps the public better identify, understand, and respond to signs of mental illnesses in youth and adults.
