[Asthma, Allergies, &
COPD 2024](#)

This training session offers attendees a chance to learn about asthma and COPD issues as well as allergies, and how all these issues affects the airway. It provides education for the risk factors, symptoms and current treatment trends of airway illnesses. Providers of all disciplines can learn how to use this information to write integrated health goals for Individual Plans of Service, by creating S.M.A.R.T. Outcomes and planning appropriate interventions.
