

## **Service Codes Authorized Without A Prospective Medical Necessity Review**

The primary case holder is responsible for ensuring that all services listed in the Individual Plan of Service (IPOS) are authorized in the FOCUS Electronic Medical Record (EMR). Authorizations must be entered with the amount, scope, and duration that is medically necessary for the person served as supported by the documentation in the medical record. MCCMH has identified the following service codes as not requiring a prospective medical necessity review. These codes are subject to retrospective review to ensure that provided services meet the standards for eligibility and medical necessity.

90791	Integrated Biopsychosocial Assessment
9079X	Psychiatric Diagnostic Evaluation
9083X	Psychotherapy
9084X	Family Therapy
90853	Group Therapy, Adult or Child
96372	Medication Administration
