

Good Data Promotes Good Decisions

Where do you start and how do you know the data is valid and free of bias? The following are reliable data sources and factsheets for substance use disorder and census/demographics that can help with grant writing, strategic planning and making data-driven decisions.

RELIABLE DATA

Behavior Risk Factor Surveillance System (BRFSS) is composed of annual, state-level telephone surveys from Michigan residents ages 18 and over data focusing on health risk behaviors, health indicators, and chronic diseases both at the state and local level. See the survey results and more [here](#).

CDC

Search by health topic, [Centers for Disease Control and Prevention | CDC](#)

National Center for Health Statistics provides statistics based on health topics for different demographics. www.cdc.gov/nchs/hus.htm

KFF

State Health Facts provides information on different demographics, access to care, health coverage, and health status. www.statehealthfacts.org
